

How do I compile a C++ program in Visual Studio Code?

1. Open the Visual Studio Code application.
2. Click on the "File" menu and select "Open Folder."
3. Select the folder that contains your C++ program.
4. Click on the "View" menu and select "Open in Terminal."
5. In the terminal, type "g++ " and then the name of your C++ program file. For example, if your program is named "test.cpp", you would type "g++ test.cpp".
6. Press the "Enter" key. Your C++ program will be compiled.
